

Procedure for applying for admission to the Bachelor's/Master's thesis

Please work through the "Application for admission..." form in the order given.

Please note!

Please submit the application more than 3 days in advance, but not more than 14 days in advance, so that the relevant Chairperson of the Examination Board is able to admit you to the thesis before your planned starting date.

If the Chairperson approves your application without any changes, the corresponding data will be entered into your QIS account. There will not be any additional notification.

In the event of any deviations from your application, you will be informed as quickly as possible by e-mail to your stu-account.

If you are unsure whether you fulfil the requirements for admission to a final thesis, please e-mail your Examination Office in advance.
(If you are missing the technical industry internship, you can still submit your application without contacting the Examination Office first.)
